

FTMaintenance Select Mobile App

FTMaintenance Select Mobile App

The FTMaintenance Select mobile app provides anytime, anywhere access to your maintenance data from internet-connected devices. The FTMaintenance Select mobile app provides maintenance technicians with essential work order, asset, and inventory management functionality needed to perform day-to-day maintenance activities wherever they go, from the convenience of a mobile device.

Features and Functionality:

- **Work Order Management**
 - Give your technicians access to the entire work order list
 - Easily find work orders with search, sort, and query functions
 - Update work orders with documentation of work completed
 - Print and email work orders
 - Access and search the asset list for asset location and status information
 - Improve maintenance documentation with attachments including on-the-fly photos
 - Quickly create work orders and service requests
 - Update work order status to communicate work that is blocked and completed
 - Provide technicians with troubleshooting tools through access to work order history
- **Asset Management**
 - Easily enter asset data through barcodes
 - Quickly find assets with multiple search options
 - Assign assets to work orders while out in the field
 - Update an asset's status, location, and meter runtime
- **Inventory Management**
 - Quickly find inventory items with multiple search options
 - Assign parts to work orders while out in the field
 - Provide technicians with critical inventory information including part quantities and storage locations
 - Allocate, pull, and restock parts from work orders
