

# FTMaintenance Select

Computerized Maintenance Management System (CMMS) Software

**Make Maintenance Management Easy**

# A Full Suite of Features. All in One Place.

## FTMaintenance Select Features and Benefits

### Work Order Management

- Track work orders throughout their entire life cycle - from the initial request to completion and history
- Generate work orders in seconds from a centralized system
- Update and complete work orders from the field using the FTMaintenance Select mobile app

### Asset Management

- Track multiple types of assets and their locations in a single system
- Leverage historical asset data to optimize maintenance planning and scheduling
- Track asset health to maximize efficiency and extend asset life

### MRO Inventory Management

- Organize your inventory catalog for easy item location and identification
- Monitor demand for inventory items via automatic quantity updates
- Automatically document changes to inventory via transactions

### Preventive Maintenance

- Create master work order templates for recurring maintenance work
- Schedule preventive maintenance work using time-based or usage-based intervals
- Maintain full visibility of the maintenance schedule from multiple calendar views

### Maintenance Requests

- Create a single channel of communication for users and guests to request maintenance assistance
- Standardize service requests with an easy-to-use online request form
- Establish a service request approval process

### Reports and Dashboards

- Monitor key performance indicators (KPIs) on an interactive dashboard
- Create and share critical maintenance management reports
- Drill down to the exact information you need with data search, sort, and query capability

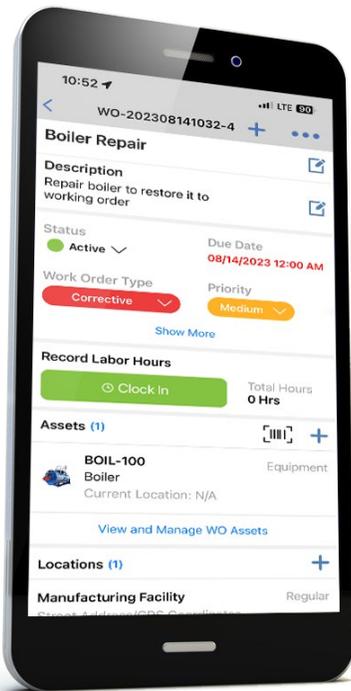

### Mobile Accessibility

- Access essential FTMaintenance Select functionality from a mobile device
- Increase productivity by providing access to maintenance data from the field
- Improve the accuracy of data entry and asset identification using barcode scanning capability

# Empower Technicians with Mobile CMMS

Provide maintenance technicians with essential work order, asset, and inventory functionality needed to perform day-to-day maintenance activities wherever they go, from the convenience of a mobile device.

- Streamline communication between you and your maintenance team
- Improve productivity and performance with access to real-time information
- Increase efficiency by accessing assigned work orders from anywhere using a mobile device
- Improve the accuracy of maintenance documentation

## Why Choose FTMaintenance Select?

### Full Suite of Maintenance Management Features

FTMaintenance Select is a full suite of tools for maintenance management: work order management, asset and equipment management, MRO inventory management, preventive maintenance, reporting, maintenance requests, and mobile maintenance management.

### Easy-to-Use Maintenance Software

Maintenance technicians, maintenance managers, requesters, and other users are able to confidently use FTMaintenance Select with minimal training.

### Flexible Pricing Structure

Low-cost user licensing allows you to cost-effectively scale FTMaintenance Select as your company grows. We offer a range of purchase and deployment options to meet your budget and organizational needs.

### Experience and Expertise

For over 30 years, we have helped over 20,000 customers worldwide solve their unique business challenges. Our team works collaboratively to deliver solutions that exceed customer expectations.

### Implementation and Ongoing Support

No premium support package required. We provide complimentary implementation services, unlimited customer support, and free product upgrades.

# About FasTrak SoftWorks, Inc.

## Who We Are

FasTrak SoftWorks, Inc. is a diversified supplier of industrial automation and computerized maintenance management system (CMMS) software. Our customers have relied on us to help them solve their unique business challenges, allowing them to better serve their markets and communities. For over 30 years, we have empowered industrial plants to go to production faster and to avoid costly downtime.

## Our Customers

Our innovative products are used in companies of all sizes, from Fortune 100 companies to family-owned businesses at the local, state, national, and global level. Our ever-growing client base consists of companies in a variety of industries including manufacturing, food processing, water and wastewater, power and energy, medical and pharmaceutical, oil and gas, and more.

## Our Culture

FasTrak is located in America's Dairyland, just north of Milwaukee, Wisconsin. We apply a Midwestern work ethic to the development of products and services designed to exceed customer expectations. Our dedication to working hard, providing practical solutions, and "rolling up our sleeves" helps us drive customer success, regardless of company size or industry.

## Our Commitment to Customer Success

FasTrak is committed to the long-term development, service, and support of the FTMaintenance Select platform. We have built a sterling reputation by providing unmatched support, consulting, and other services with an experienced training staff, responsive technical support team and consultants, and knowledgeable product experts. We deliver individualized customer service, build personal relationships, and give customers the special attention needed to protect their substantial investments in equipment, facilities, and automation.
